GLASS BOTTLES XYLOPHONE

MATERIALS

- Glass bottles
- Water
- Food coloring
- A spoon or wooden stick

And lots of creativity!

LET'S MAKE ART?

Passo 1: To build a bottle xylophone, you will need to line up some glass bottles on a table or desk. Choose as many bottles as you want.

Passo 2: The secret to making the bottles all sound different is the amount of water inside each bottle. You can fill the first bottle to the top, for example.

Passo 3: Fill the next bottle, but not to the top. Just a little bit below the first one. Do the same with the others, leaving different levels of water. More water will make a lower sound, and less water will make a higher sound.

Passo 4: Now you can make it even more fun! Add a few drops of food coloring to each bottle and create a rainbow!

Passo 5: You can use a spoon or a wooden stick for tapping. The most important thing is to be gentle to avoid breaking the glass!

Passo 6: That's it! Now that you have a glass xylophone, you can play all the music you want! Let's see if you can do it? Use your imagination! Do as you like and be creative. Play with some sounds and create your own songs!
